

NEW WATER SERVICE POLICY AND PROCEDURES

Columbia Water Company policy and procedures for a new residential water service are as follows:

Customer's Responsibility

1. Complete an application for water service.
2. Pay a \$350.00 deposit, which is refunded after first month's water bill is paid.
3. Meter pit will be required when house is more than one hundred (100) feet from the road. If a meter pit is required it must meet Columbia Water Company specifications. CWC recommends purchasing from Exeter Supply Corp. or L/B Water Co.
4. All plumbing work (including materials and labor) from curb stop to inside customer's residence. All plumbing must meet Columbia Water Company specifications, which are attached, a dual check valve is required by the EPA (Environmental Protection Agency). A pressure regulating valve is required if pressure in the area has the potential to be greater than 75 pounds per square inch (psi).
5. Any permits which may be required by the local township (only for work done by Plumber or Contractor hired by the Customer).
6. Service line trench from the curb stop to the house must be inspected by Columbia Water Company personnel prior to covering with dirt.
7. Only one (1) outside faucet may be connected to a well. All internal plumbing must be connected to Columbia Water Company.
8. After Columbia Water Company has completed the installation of its service line from the water main to the customer's curb stop: the customer then has ninety (90) days to connect to the Company's water service.

Columbia Water Company's Responsibility

1. Street opening permits required by the local township or PennDOT.
2. All materials and labor required to complete the tie-in from the water main to the customer's curb stop.
3. The Company supplies the curb stop and meter.

If you require any additional information please contact the Columbia Water Company's office, at (717) 684-2188.
